Thin Solid Films 299 (1997) 193–195

thin solid films

Subject Index of Volume 299

Absorption spectroscopy
properties of 13^2-hydroxy bacteriopheophorbide *a* methylester/behenic acid mixed mono- and multilayers, 152
Adsorption
scanning tunneling microscopy combined quartz crystal microbalance for study of NH_3 adsorption on Ag thin film, 78
Aluminium
XRD analysis of ZnO thin films prepared by spray pyrolysis, 72
orientation relationships in heteroepitaxial aluminum films on sapphire, 110
Aluminium oxide
orientation relationships in heteroepitaxial aluminum films on sapphire, 110
microstructural investigation of plasma-sprayed ceramic splats, 125
Aluminium nitride
high quality optoelectronic grade epitaxial AlN films on α-Al_2O_3, Si and 6H-SiC by pulsed laser deposition, 94
Amorphous materials
interface vibrational spectrum investigation on reactively-sputtered a-Si:H/a-Ge:H multilayer films, 10
near-infrared tunable response photodetectors based on amorphous/crystalline silicon heterostructures prepared by the r.f. magnetron sputtering technique, 173
Annealing
phase formation during the reactive annealing of Cu–In films in H_2S atmosphere, 38
Atomic force microscopy (AFM)
microstructural investigation of plasma-sprayed ceramic splats, 125
Auger electron spectroscopy
X-ray photoemission and Auger electron spectroscopy analysis of fast responding activated metal oxide silicon carbide gas sensors, 183

Bacteriochlorophyll
properties of 13^2-hydroxy bacteriopheophorbide *a* methylester/behenic acid mixed mono- and multilayers, 152
Bacteriopheophorbides
properties of 13^2-hydroxy bacteriopheophorbide *a* methylester/behenic acid mixed mono- and multilayers, 152
Barium strontium titanate
on the microstructure and optical properties of $Ba_{0.5}Sr_{0.5}TiO_3$ films, 14
Boron nitride
a study of deuterium permeation through thin BN films, 5

Cadmium sulphide
X-ray photoelectron spectroscopy, scanning electron microscopy and optical transmittance studies of indium tin oxide and cadmium sulphide thin films for solar cells, 67
Capacitors
microstructure properties of $Ba_{0.5}Sr_{0.5}TiO_3$ thin films on Si with conductive $SrRuO_3$ bottom electrodes, 115
Charging
charge injection in $SrTiO_3$ thin films, 53

Coatings
effect of some sodium salts coatings on the high-temperature oxidation of Nimonic-80A alloy at 1173 K, 1
some aspects of the aerosol–gel process, 25
standardisation of test methods for the mechanical properties of thin coatings, 82
Copper
phase formation during the reactive annealing of Cu–In films in H_2S atmosphere, 38
Crystallization
interface vibrational spectrum investigation on reactively-sputtered a-Si:H/a-Ge:H multilayer films, 10

Deposition process
some aspects of the aerosol–gel process, 25
Deposition temperatures
phosphor efficiency and deposition temperature in ZnS:Mn A.C. thin film electroluminescence display devices, 33
Deuterium
a study of deuterium permeation through thin BN films, 5
Dielectrics
microstructure properties of $Ba_{0.5}Sr_{0.5}TiO_3$ thin films on Si with conductive $SrRuO_3$ bottom electrodes, 115

Elastic properties
FMR, XRD and XHRTEM characterization of stresses in an epitaxial Ni–Cu film prepared on MgO(001) by d.c. biased plasma sputter deposition, 59
Electrodeposition
the influence of the electrodeposition parameters on the morphology of organo-transition metal complexes for thin film gas sensor applications, 18
Electroluminescence
phosphor efficiency and deposition temperature in ZnS:Mn A.C. thin film electroluminescence display devices, 33
Electronic devices
influence of strain on the electronic properties of epitaxial V_2O_3 thin films, 119
Electron microscopy
orientation relationships in heteroepitaxial aluminum films on sapphire, 110
Epitaxy
FMR, XRD and XHRTEM characterization of stresses in an epitaxial Ni–Cu film prepared on MgO(001) by d.c. biased plasma sputter deposition, 59
high quality optoelectronic grade epitaxial AlN films on α-Al_2O_3, Si and 6H-SiC by pulsed laser deposition, 94
orientation relationships in heteroepitaxial aluminum films on sapphire, 110
influence of strain on the electronic properties of epitaxial V_2O_3 thin films, 119

Elsevier Science S.A.

Evaporation
thin film preparation of oligomeric Si-phthalocyanines: thermal stability and sublimation behavior, 63
electroluminescent cell prepared by chemical deposition of ZnS:Mn thin film, 149

Fluorescence spectroscopy
properties of 13^2-hydroxy bacteriopheophorbide *a* methylester/behenic acid mixed mono- and multilayers, 152

Gallium arsenide
the influence of the inductively-coupled hydrogen plasma on the GaAs surface properties, 136
Gas sensors
the influence of the electrodeposition parameters on the morphology of organo-transition metal complexes for thin film gas sensor applications, 18
Growth mechanism
high quality optoelectronic grade epitaxial AlN films on α-Al_2O_3, Si and 6H-SiC by pulsed laser deposition, 94

Heterostructures
characterization of poly(3-decylmethoxythiophene) multilayers, 169
near-infrared tunable response photodetectors based on amorphous/crystalline silicon heterostructures prepared by the r.f. magnetron sputtering technique, 173
Hydrogen
the influence of the inductively-coupled hydrogen plasma on the GaAs surface properties, 136
Hydrogen sulphide
phase formation during the reactive annealing of Cu–In films in H_2S atmosphere, 38

Indium
phase formation during the reactive annealing of Cu–In films in H_2S atmosphere, 38
Indium oxide
X-ray photoelectron spectroscopy, scanning electron microscopy and optical transmittance studies of indium tin oxide and cadmium sulphide thin films for solar cells, 67
In-plane distribution
properties of 13^2-hydroxy bacteriopheophorbide *a* methylester/behenic acid mixed mono- and multilayers, 152
Interfaces
interface vibrational spectrum investigation on reactively-sputtered a-Si:H/a-Ge:H multilayer films, 10
microstructural investigation of plasma-sprayed ceramic splats, 125

Langmuir–Blodgett films
properties of 13^2-hydroxy bacteriopheophorbide *a* methylester/behenic acid mixed mono- and multilayers, 152
photovoltage study of Langmuir–Blodgett films of corbathiene on silicon, 161
structural analysis of mixed LB multilayers and superlattice films, 165
characterization of poly(3-decylmethoxythiophene) multilayers, 169
Laser ablation
high quality optoelectronic grade epitaxial AlN films on α-Al_2O_3, Si and 6H-SiC by pulsed laser deposition, 94
microstructure properties of $Ba_{0.5}Sr_{0.5}TiO_3$ thin films on Si with conductive $SrRuO_3$ bottom electrodes, 115

Mechanical properties
standardisation of test methods for the mechanical properties of thin coatings, 82
Metallization
surface characterization of plasma spray metal deposition procedures using X-ray photoelectron spectroscopy, 143
Metal-oxide semiconductor structure
X-ray photoemission and Auger electron spectroscopy analysis of fast responding activated metal oxide silicon carbide gas sensors, 183
Micromachining
sol–gel derived PNNZT thin films for micromachined piezoelectric force sensors, 88
Microstructure
on the microstructure and optical properties of $Ba_{0.5}Sr_{0.5}TiO_3$ films, 14
Monolayers
properties of 13^2-hydroxy bacteriopheophorbide *a* methylester/behenic acid mixed mono- and multilayers, 152
Multilayers
interface vibrational spectrum investigation on reactively-sputtered a-Si:H/a-Ge:H multilayer films, 10
structural analysis of mixed LB multilayers and superlattice films, 165

Nickel
effect of some sodium salts coatings on the high-temperature oxidation of Nimonic-80A alloy at 1173 K, 1
photoactivity enhancement of WS_2 sputtered thin films by use of nickel, 45

Optical properties
on the microstructure and optical properties of $Ba_{0.5}Sr_{0.5}TiO_3$ films, 14
photovoltage study of Langmuir–Blodgett films of corbathiene on silicon, 161
characterization of poly(3-decylmethoxythiophene) multilayers, 169
Optical spectroscopy
characterization of poly(3-decylmethoxythiophene) multilayers, 169
Organic substances
photovoltage study of Langmuir–Blodgett films of corbathiene on silicon, 161
Organometallic compounds
thin film preparation of oligomeric Si-phthalocyanines: thermal stability and sublimation behavior, 63
Organo-transition metal complexes
the influence of the electrodeposition parameters on the morphology of organo-transition metal complexes for thin film gas sensor applications, 18
Oxidation
effect of some sodium salts coatings on the high-temperature oxidation of Nimonic-80A alloy at 1173 K, 1
Oxides
microstructural investigation of plasma-sprayed ceramic splats, 125

Phase transition
dependence of the *C*49–*C*54 $TiSi_2$ phase transition temperature on film thickness and Si substrate orientation, 178
Phase transitions
electroluminescent cell prepared by chemical deposition of ZnS:Mn thin film, 149
Phosphor
phosphor efficiency and deposition temperature in ZnS:Mn A.C. thin film electroluminescence display devices, 33
Photosensitizers
properties of 13^2-hydroxy bacteriopheophorbide *a* methylester/behenic acid mixed mono- and multilayers, 152
Photovoltage
photovoltage study of Langmuir–Blodgett films of corbathiene on silicon, 161
Piezoelectric effects
sol–gel derived PNNZT thin films for micromachined piezoelectric force sensors, 88
Plasma processing and deposition
microstructural investigation of plasma-sprayed ceramic splats, 125

near-infrared tunable response photodetectors based on amorphous/crystalline silicon heterostructures prepared by the r.f. magnetron sputtering technique, 173
Polymers
characterization of poly(3-decylmethoxythiophene) multilayers, 169
Pulsed laser deposition
on the microstructure and optical properties of $Ba_{0.5}Sr_{0.5}TiO_3$ films, 14
Pyrolysis
XRD analysis of ZnO thin films prepared by spray pyrolysis, 72

Quartz
scanning tunneling microscopy combined quartz crystal microbalance for study of NH_3 adsorption on Ag thin film, 78

Rutherford backscattering spectroscopy
photoactivity enhancement of WS_2 sputtered thin films by use of nickel, 45

Sensors
sol–gel derived PNNZT thin films for micromachined piezoelectric force sensors, 88
X-ray photoemission and Auger electron spectroscopy analysis of fast responding activated metal oxide silicon carbide gas sensors, 183
Silicides
electroluminescent cell prepared by chemical deposition of ZnS:Mn thin film, 149
Silicon
near-infrared tunable response photodetectors based on amorphous/crystalline silicon heterostructures prepared by the r.f. magnetron sputtering technique, 173
dependence of the *C*49–*C*54 $TiSi_2$ phase transition temperature on film thickness and Si substrate orientation, 178
Silicon carbide
X-ray photoemission and Auger electron spectroscopy analysis of fast responding activated metal oxide silicon carbide gas sensors, 183
Silicon nitride
structure and composition studies for silicon nitride thin films deposited by single ion bean sputter deposition, 104
Silicon oxide
some aspects of the aerosol–gel process, 25
Silver
scanning tunneling microscopy combined quartz crystal microbalance for study of NH_3 adsorption on Ag thin film, 78
Sodium
effect of some sodium salts coatings on the high-temperature oxidation of Nimonic-80A alloy at 1173 K, 1
Sol–gel
some aspects of the aerosol–gel process, 25
Sol–gels
sol–gel derived PNNZT thin films for micromachined piezoelectric force sensors, 88
Sputtering
photoactivity enhancement of WS_2 sputtered thin films by use of nickel, 45
FMR, XRD and XHRTEM characterization of stresses in an epitaxial Ni–Cu film prepared on MgO(001) by d.c. biased plasma sputter deposition, 59
structure and composition studies for silicon nitride thin films deposited by single ion bean sputter deposition, 104
Standardisation
standardisation of test methods for the mechanical properties of thin coatings, 82
STM
scanning tunneling microscopy combined quartz crystal microbalance for study of NH_3 adsorption on Ag thin film, 78
Strain
influence of strain on the electronic properties of epitaxial V_2O_3 thin films, 119
Stress
FMR, XRD and XHRTEM characterization of stresses in an epitaxial Ni–Cu film prepared on MgO(001) by d.c. biased plasma sputter deposition, 59
Strontium
charge injection in $SrTiO_3$ thin films, 53
Structural properties
structure and composition studies for silicon nitride thin films deposited by single ion bean sputter deposition, 104
microstructure properties of $Ba_{0.5}Sr_{0.5}TiO_3$ thin films on Si with conductive $SrRuO_3$ bottom electrodes, 115
Superlattices
structural analysis of mixed LB multilayers and superlattice films, 165
Surface composition
structure and composition studies for silicon nitride thin films deposited by single ion bean sputter deposition, 104
surface characterization of plasma spray metal deposition procedures using X-ray photoelectron spectroscopy, 143
Surface morphology
effect of some sodium salts coatings on the high-temperature oxidation of Nimonic-80A alloy at 1173 K, 1
Surface structure
the influence of the inductively-coupled hydrogen plasma on the GaAs surface properties, 136

Thermal desorption
thin film preparation of oligomeric Si-phthalocyanines: thermal stability and sublimation behavior, 63
Tin oxide
X-ray photoelectron spectroscopy, scanning electron microscopy and optical transmittance studies of indium tin oxide and cadmium sulphide thin films for solar cells, 67
Titanium
surface characterization of plasma spray metal deposition procedures using X-ray photoelectron spectroscopy, 143
Titanium oxide
charge injection in $SrTiO_3$ thin films, 53
Titanium silicide
dependence of the *C*49–*C*54 $TiSi_2$ phase transition temperature on film thickness and Si substrate orientation, 178

Vanadium oxide
influence of strain on the electronic properties of epitaxial V_2O_3 thin films, 119

X-ray diffraction
photoactivity enhancement of WS_2 sputtered thin films by use of nickel, 45
XRD analysis of ZnO thin films prepared by spray pyrolysis, 72
structural analysis of mixed LB multilayers and superlattice films, 165
X-ray photoelectron spectroscopy
X-ray photoelectron spectroscopy, scanning electron microscopy and optical transmittance studies of indium tin oxide and cadmium sulphide thin films for solar cells, 67
X-ray photoemission and Auger electron spectroscopy analysis of fast responding activated metal oxide silicon carbide gas sensors, 183
X-ray photoelectron spectroscopy (XPS)
surface characterization of plasma spray metal deposition procedures using X-ray photoelectron spectroscopy, 143
X-ray scattering
the influence of the inductively-coupled hydrogen plasma on the GaAs surface properties, 136

Zinc oxide
XRD analysis of ZnO thin films prepared by spray pyrolysis, 72
